

src/redirect_manager
/redirect_manager_internal.h

```
graph BT; A["src/redirect_manager  
/redirect_manager.c"] --> B["src/redirect_manager  
/redirect_manager_internal.h"]; C["src/redirect_manager  
/redirect_manager_debug.c"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: 'src/redirect_manager/redirect_manager_internal.h'. Below it are two white boxes representing source files: 'src/redirect_manager/redirect_manager.c' on the left and 'src/redirect_manager/redirect_manager_debug.c' on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.
