

src/signal_manager
/signal_manager_internal.h

```
graph BT; A["src/signal_manager  
/signal_manager.c"] --> B["src/signal_manager  
/signal_manager_internal.h"]; C["src/signal_manager  
/signal_manager_utils.c"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: 'src/signal_manager /signal_manager_internal.h'. Below it are two white boxes representing source files: 'src/signal_manager /signal_manager.c' on the left and 'src/signal_manager /signal_manager_utils.c' on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.
