

init\_environment\_var

```
graph LR; A[init_environment_var] --> B[ft_calloc];
```

A diagram showing a call from the function `init_environment_var` to the function `ft_calloc`. The function `init_environment_var` is represented by a gray rectangular box on the left, and the function `ft_calloc` is represented by a white rectangular box on the right. A blue arrow points from the right side of the `init_environment_var` box to the left side of the `ft_calloc` box, indicating the direction of the call.

ft\_calloc
